

APPROVING A GOAL FOR CLASSROOM SEAT UTILIZATION

The goal for the aggregate seat utilization rate, as of the official census date for day and/or evening sessions, shall be at an 88% rate of aggregate seat limits, it being understood that utilization shall be based upon seats taken vs official class seat limits.

The individual class sections may fill to a 100% seat utilization rate without conflicting with the intent of this goal for aggregate seat utilization rates, when there is an indication that the 88% rate will likely be exceeded in either the day and/or evening session, direction shall be forthcoming from the Vice President for Academic and Student Affairs to the Campus Executive Deans as regards to how to proceed with management of the schedule.
